MIDWEST WASHING EQUIPMENT LLC

RIG SPECIFICATION

Lucid Peak Drone Wash Rig

ENCLOSED TRAILER WASH SYSTEM

Trailer Specification: American-made white 7′×14′ tandem-axle enclosed trailer (3,500-lb capacity per axle). V-nose style with rear double doors and a passenger-side door. Floor and 18″ up the walls coated with an industrial-grade weatherproof spray liner.

Pressure Wash System: 8.0 GPM, 3,500 PSI industrial high-pressure pump. Gear-driven industrial triplex plunger pump powered by a Honda GX690 electric-start engine with RigLink remote start/stop, on a stainless platform with vibration isolators.

Pressure Wash Chemical Injection: RigLink remote downstream injector bypass with ClearView V4 soap selector.

Soft Wash System: Gear-driven Comet P40 diaphragm pump — 11.5 GPM at 300 PSI, powered by an electric-start Honda GX160/GX200 engine with RigLink remote start/stop, on a corrosion-resistant stainless-steel platform with vibration isolators.

Chemical Metering System: ClearView Hydro-Mixer XL connected to the soft wash pump — eliminates batch mixing and lets you blend water, chemicals, and soap while cleaning. Labeled valves for estimating output ratios. Controls for raw water, soap, chem, and DI water, plus a soap selector to switch between two soaps and a RigLink remote rinse module to turn chemical and soap on and off.

Pure Water System: 4-stage RO/DI filtration: 10″ sediment and 10″ carbon prefilters, (3) 40″ reverse-osmosis membranes, (1) high-capacity DI resin tank, a 110-volt booster pump, and an inline dual TDS meter to compare incoming and filtered water quality.

Tanks: (1) 200-gallon raw/DI water tank, (1) 55-gallon chem tank, (2) 7-gallon soap tanks.

Hose Reels & Hose: (3) 12″ electric reels with aluminum frames and stainless-steel internals — High Pressure: 200′×3/8″ HP hose (grey, non-marking); Water Supply: 200′×5/8″ supply hose; Soft Wash: 100′×5/8″ + 200′×3/8″ soft wash hose.

Electrical: (1) Group 27 marine deep-cycle battery in a waterproof box. All electronics wired through a waterproof fuse panel with an on/off switch to protect the motors and wiring from a power surge. Onboard charger installed.

Standard Accessories: High Pressure: (1) HP gun, insulated wand, JROD w/ nozzles. Soft Wash: (1) gun, wand, JROD w/ nozzles.

12-volt 2.2 GPM pure water delivery pump	–	✓	–	✓
Manual hose reel with 150′×3/8″ water-fed pole hose	–	✓	–	✓
30′ Tucker carbon-fiber water-fed pole & brush	–	✓	–	✓
12-volt diesel fired on-demand heater for the high-pressure system, temperature control included	–	–	✓	✓
Extends skid platform length to 120″	–	–	✓	✓
Upgrade cost over the base rig	**—**	**+$1,700**	**+$4,800**	**+$6,500**

All package prices are all-in and replace the base rig price — they are not add-ons. Freight shipping quoted separately (TBD).

PEAK PRO

Adds the manual pure water pole kit so a tech can finish windows and lower-level facade work by hand while the drone handles height. The most common upgrade.

PEAK FORCE

Adds diesel on-demand hot water to the high-pressure system. Hot water cleans better and faster and uses less chemical in most applications.

PEAK ULTRA

Both upgrades together: the pure water pole kit and the hot water system. The fully equipped configuration.

Note on Force and Ultra: adding the hot water system extends the skid platform length to 120″. Confirm available trailer floor space before ordering.
